PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building and deploying real-world AI applications using Python, Machine Learning, Generative AI, and FastAPI. Experienced in LLM applications, AI agents, RAG systems, deep learning, API development, and cloud deployment. Delivered AI, automation, and data solutions for clients across diverse use cases, including confidential AI projects under NDA. Strong foundation in TensorFlow, Scikit-learn, and practical AI application development.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JavaScript (Basic), HTML/CSS
- **Generative AI & LLMs:** LLM Applications, Prompt Engineering, AI Agents, Retrieval-Augmented Generation (RAG), Vector Embeddings, Semantic Search, SBERT, TF-IDF, Cosine Similarity, Local LLM Deployment (Llama), Gemini API, Groq API
- **AI-Assisted Development & Agentic Tools:** Claude Code, OpenAI Codex, Model Context Protocol (MCP), AI-Assisted Software Development, Agentic Coding Workflows
- **Machine Learning & Deep Learning:** Scikit-learn, TensorFlow/Keras, XGBoost, Random Forest, Regression, Classification, Feature Engineering, LSTM Neural Networks, Model Evaluation
- **Backend Development:** FastAPI, Flask, RESTful API Design, API Integration, Firebase Authentication
- **Development & Deployment:** Docker, Git, GitHub Actions (CI/CD), AWS EC2, Render, Modular ML Pipelines
- **Data Engineering & Analytics:** Pandas, NumPy, ETL Pipelines, Data Cleaning & Preprocessing, SQL (CTEs, Window Functions), Power BI, Tableau, Advanced Excel

PROFESSIONAL EXPERIENCE

Freelance AI Engineer (Self-Employed / Independent Consultant)

Feb 2023 – Present

- Built an AI agent for a government employee client that reads incoming letters/emails, classifies them by department, and auto-logs structured records to a spreadsheet — eliminating manual letter triage.
- Developed an automated tender-data pipeline that scrapes daily listings from the Government e-Marketplace (GeM) portal and emails a formatted report to the client on a recurring schedule — running unattended in production.
- Delivered project-based freelance engagements alongside coursework, applying Python, FastAPI, and LLM-based automation to real client workflows.
- Designed and delivered business dashboards and reporting solutions using SQL, Python, Power BI, and Excel for client-specific analytics requirements.
- Worked directly with clients to gather requirements, design technical solutions, integrate APIs/data sources, deploy applications, and provide post-delivery support.

Marketing Data Analyst | Spark Allies LLC

Aug 2024 – Oct 2025

- Analyzed multi-channel campaign data (SEO, paid ads) to identify high-conversion user segments, improving lead generation efficiency by 30%.
- Collaborated with engineering teams to automate analytics workflows and improve reporting efficiency using Python and BI tools.
- Conducted statistical analysis on campaign performance to forecast traffic and engagement trends.
- Designed data-driven content optimization strategies using keyword and behavioral analytics.

TECHNICAL PROJECTS

FinanceAI – Intelligent Stock Analysis Platform | Full-Stack ML Engineer

- Built an end-to-end AI financial intelligence platform integrating **LLaMA 4 (via Groq)** for LLM-powered investment analysis, generating sentiment classification (Bullish/Bearish/Neutral), key risk/strength identification, and price target recommendations.
- Engineered a 2-layer **LSTM deep learning model** (TensorFlow/Keras) for 7-day stock price forecasting with ~8.45% MAPE, trained on 1 year of daily closing prices with 60-day sequence windows.
- Implemented **Z-Score statistical anomaly detection** with a 2.0 SD threshold to automatically identify and classify market crashes and spikes across 3-month rolling windows.
- Built a **RAG pipeline using ChromaDB** for vector-based knowledge retrieval, combined with real-time stock data (yFinance) and live news integration for context-aware analysis.
- **Live Demo:** <https://financeai-968a9.web.app>

EDUCATION

Master of Computer Applications (MCA) – Data Science & AI

2024 – 2026

Manipal University Jaipur

Bachelor of Computer Applications (BCA)

2019 – 2022

Star Infotech College, Ajmer
