PROFESSIONAL SUMMARY

Data Science & AI postgraduate with experience building end-to-end machine learning applications, recommendation systems, and AI-powered analytics platforms. Skilled in Python, SQL, Deep Learning, FastAPI, Flutter, and cloud deployment, with a focus on developing scalable solutions that deliver real-world business impact.

TECHNICAL SKILLS

- **Machine Learning & AI:** Supervised & Unsupervised Learning, Regression Modeling, Ensemble Methods (XGBoost, Random Forest), Cross-Validation (K-Fold), Hyperparameter Tuning (Grid/Random Search), Feature Engineering, Bias-Variance Optimization, Model Evaluation (R^2 , RMSE, MAE, Precision/Recall).
- **Deep Learning & NLP:** Sentence-BERT (SBERT), TensorFlow, HuggingFace Transformers, Vector Embeddings, Retrieval-Augmented Generation (RAG), Semantic Similarity, TF-IDF, Cosine Similarity, LSTM Neural Networks.
- **MLOps & Deployment:** FastAPI, Flask, RESTful API Design, Model Serialization (Joblib), CI/CD (GitHub Actions), AWS EC2, Render Deployment, Git, Docker, Modular ML Pipelines.
- **Data & Analytics:** Python (NumPy, Pandas, Scikit-learn), SQL (CTEs, Window Functions), ETL Pipelines, Data Cleaning & Preprocessing, Power BI, Tableau, Advanced Excel.

PROFESSIONAL EXPERIENCE

Marketing Data Analyst Intern | Spark Allies LLC *Aug 2023 – Oct 2024*

- Analyzed multi-channel campaign data (SEO, paid ads) to identify high-conversion user segments, improving lead generation efficiency by 30%.
- Built automated KPI dashboards in Power BI, reducing manual reporting effort and improving stakeholder decision turnaround.
- Conducted statistical analysis on campaign performance to forecast traffic and engagement trends.
- Designed data-driven content optimization strategies using keyword and behavioral analytics.

TECHNICAL PROJECTS

CineMatch – AI-Powered Entertainment Recommendation Platform | *Full-Stack ML Engineer*

- Built and deployed a hybrid recommendation system combining **SBERT embeddings (60%)** and **TF-IDF similarity (40%)** to deliver personalized recommendations across **42,000+ movies, anime, K-dramas, and TV titles**.
- Developed an automated ETL pipeline using the TMDb API for large-scale metadata ingestion, cleaning, and feature engineering.
- Engineered a production-ready FastAPI backend and Flutter Web frontend with Firebase Authentication, Google Sign-In, personalized onboarding, and dynamic genre-based UI adaptation.
- Integrated Firebase Firestore to capture user preferences, ratings, reviews, watchlists, and recommendation interactions for personalization and analytics.
- **Live Demo:** <https://cinematch-v2-e3f6a.web.app/>

FinanceAI – Intelligent Stock Analysis Platform | *Full-Stack ML Engineer*

- Built an end-to-end AI financial intelligence platform integrating **LLaMA 4 (via Groq)** for LLM-powered investment analysis, generating sentiment classification (Bullish/Bearish/Neutral), key risk/strength identification, and price target recommendations.
- Engineered a 2-layer **LSTM deep learning model** (TensorFlow/Keras) for 7-day stock price forecasting with ~2.45% MAPE, trained on 1 year of daily closing prices with 60-day sequence windows.
- Implemented **Z-Score statistical anomaly detection** with a 2.0 SD threshold to automatically identify and classify market crashes and spikes across 3-month rolling windows.
- Built a **RAG pipeline using ChromaDB** for vector-based knowledge retrieval, combined with real-time stock data (yFinance) and live news integration for context-aware analysis.
- Deployed a production-grade FastAPI backend on Render and Flutter Web frontend on Firebase Hosting, with Firestore integration for per-user search history, forecast results, and anomaly tracking **Live Demo:** <https://financeai-968a9.web.app>

EDUCATION

Master of Computer Applications (MCA) Online – Data Science & AI

2024 – 2026

Manipal University Jaipur

Bachelor of Computer Applications (BCA)

2019 – 2022

Star Infotech College, Ajmer
